Extremely powerful solver ability.Regarding the price of the game, it will only become more and more expensive, because I am making more and more money in the game, so why should something of value be cheap. This is the long-term value compounding of self-development.Be careful and

make valuable products, which is the original intention and purpose.manualcore function:1: Click the function board card to set the community card, and click the hole card icon to set the hole card.2: Different player types can be set, and each player has a different range of actions. These ranges also determine different action logics.3: Equity calculator, draw equity calculator, EV calculator, real-time poker simulator tool.4: Real-time poker simulator tool, this is the most important for online professional players, which greatly simplifies the time consumption of thinking and performing calculations.5: Advisor (advisor) provides you with a standard play, the basic guarantee is not to lose money.6: Before the action decision, provide the EV value of different actions and betsize.7: Practice the advisor and action EV in the battle mode.Core value points:1: Poker simulator tool: When playing poker online, professional players can display the complete mathematical data immediately after entering the opponent's range in real time according to the situation of the game table, saving users calculation time and energy, and providing standardized behavior suggestions. These real-time and accurate calculation data and standardized action suggestions help players make quick decisions.Value point: It saves the player's energy consumption in mathematical calculations in the game, and allows the player to invest more energy to focus on the accurate determination of the player's playing range and the use of real-time data to make decisions based on experience.Real-time display of all poker game data, which is not available in other tools. I combined the various data calculation functions scattered in multiple Texas poker calculation software into the real game. The player only needs to determine the opponent's range.In the simulator, Preflop and postflop are also purchased professional range action data, which can be set in the simulator: stacks deep, bet size, and player position to see the real-time advisor. Now this advisor is conservative.range data comes from rangeconverter/solution_formats/eight_max-MTT-Complete-Postflop-Addon-NEWOnlineViewer-yearly The core of the simulator is that you need to have the ability to judge the opponent's range of action. This is also one of the most basic and most important abilities of playing cards.If you don't have the ability to display the range of Texas Hold'em at all, then you can use this tool to repeatedly play poker to familiarize yourself with the range. In the battle mode I provide the ability to display the range in real time. Let you clearly see how different people in different ranges play, and those actions are standard textbook play styles for professional players.Real-time display of complete data: The data standard provided comes from the result of 10,000 times Equity calculated by Monte Carlo method. In the battle mode with AI, you need to turn on the observer mode switch (observer)Data in the avatar frame:1): EV: 0.70BB, indicating the EV data after the current operation. BB stands for the big blind value.2): equity data for each street:2r: 4; 12.93%. Format: 2r (to river equity, calculated to river street Equity): rank (in the current surviving players, own 2r Equity ranked); equity (own real-time 2r Equity, 2r Equity calculated from your own perspective). Indicates that the Equity data to River Street is calculated based on the player's own hole cards against other players' range or hole cards.nd: 1; 72.67%. Format: nd (next street equity, your own Equity on the next street): rank (ranked your own nd Equity among the current surviving players); equity (your own real-time nd Equity, nd Equity calculated from your own perspective). Indicates that the nd Equity data to the next street is calculated according to the player's own hole cards against other players' range or hole cards.cp: 1; 88.23%. cp (current street pure equity, the pure Equity of one's current street): rank (ranked of one's own cp Equity among the current surviving players); equity (your own real-time cp Equity, cp Equity calculated from your own perspective). Represents the calculated cp Equity data on the current street based on the player's own hole cards against other players' range or hole cards.Outs: 30, which indicates the number of draws made by players on that street. At this time, you can open the hands card strength information table, and you can see the probability of the current hole cards and board cards developing to various draws on each street.1: In preflop and river street, showing 2r is enough.2: On flop, turn street: displays the complete 2r, nd, cp data, and on flop, turn street, you can see the outs data of the player in that street at the same time.These real-time Equitys and draw data assist in determining the hole cards against other players' hole cards or ranges, their own hands card strength and winning ability, and help them make action decisions on various streets.The betsize window at the top of the interface shows the human player (self) under the

current action menu, the EV value ranking of each action in the action menu, the leftmost is the best, and it decreases from left to right (if there is only the leftmost data, then it is According to EV evaluation, this action is the most appropriate, and other actions do not need to be considered). This is based on the action logic shown by the EV. This is also the EV data of each action calculated by the player himself before the action. (The EV data in the avatar range is the EV data after the action, and the meaning of the two is different).This 4-speed EV table of betsize is the data display for making decisions based on EV when displaying the street.In fact, EV has no absolute correct meaning in action guidance before and after the flop (preflop and postflop), and it is not correct to make decisions based on the positive and negative EV.Advisor (Advisor): Shows the decision in this street, comprehensively assessing the following content: player's hole cards, opponents' range or hole cards, current own 2r, nd, cp Equity data and Equity ranked, and the player's own position Table position, player's current stacks deep, current number of people remaining at the table, EV data of each action in the current menu, and bankroll management. The current advisors tend to be conservative, and the goal is to try not to lose money.Advisor also implements a standardized pre-flop strategy in preflop.Advisor also implemented the post-flop strategy suggested by rangeconverter in postflop.In the battle against AI mode, you need to turn on the advisor mode switch (observer).Click on the user's avatar to open the user's scope, view or set the scope.Click on the hole cards, you can open to view or set the hole cards.Click on the board card, you can open to view or set the board card.In the simulator, click the D icon to switch the position of the dealer.Click the gray D icon to reset the position of the dealer.Regarding range setting or selection:1: Provides the standard range for various filling actions in the preflop stage.2: Provide 24 kinds of action ranges commonly used by professional players. Each professional player divides all hole card combinations into 10 action groups. You can see the action ranges of tag, lag, rock, maniac, and nit players.3: Provides a view of the opponent's mathematical action range based on the opponent's vpip and pfr. Vpip and pfr can view these two values of opponents from third-party statistical software licensed online, such as holdem manager 2.The graphical Equity calculator provides a complete and correct Equity calculation function.I provide complete toflop, toturn, toriver's montecarlo and Enum calculation methods. It has the same effect as Power-Equilab, and its own data is guaranteed to be correct.When Power-Equilab calculates toflop and toturn, the data is often incorrect (why it is not, you will know by playing with his montecarlo and Enum methods, the longer the calculation, the greater the deviation of the two data, which is wrong), But the calculation result of to river is correct. It sells forR$40/year. It does not have a real-time calculation method in the game. It is not suitable for actual combat, but only for review calculations, lacking actual combat significance.The provided Equity calculator, draw calculator, and EV calculator are all to ensure that you know the correctness of the data calculation results and allow you to trust the correctness and stability of the function.The AI in the battle mode comes from the range of 24 professional players. You can conduct targeted range confrontation strategy training.1): Various AIs and advisors use the same standard professional gameplay action logic. The difference from yours is only the hole cards and the action range.2): 14 types of chip depths (10BB~100BB, 200BB) are provided (different medals will open different new chip depths, and different chip depths will have different playing methods). Because of the different chip depths, the card game will be played The strategy is completely different.3): AI adopts the textbook style of professional players. You can understand the AI's action logic in thousands of matches, you can learn this action logic, and you can also find the corresponding exploiting AI logic. Repeated training can help you quickly identify the opponent's ability and the opponent's range.If it is in Steam, there is no sound.0: under \Steam\steamapps\common\Solo King-Single Player Texas Holdem Poker\Windows_Release, rename Windows_Release to Windows_Release11: Adjust your computer sound controller.2: You can download the game from D:\Steam\steamapps\common\Solo King-Single Player Texas Holdem Poker\Windows_ReleaseMove another folder, and then click TexasHoldEmSingle.exe to have sound.

Uma fila furiosa explodiu na sociedade suculenta líder do Reino Unido sobre a prática de tirar espécimes desejáveis da natureza, 4 com o presidente renunciando greenbets login protesto contra os comportamentos dos seus companheiros entusiastas.

Suculentas têm se tornado populares nos últimos anos; 4 são atraentes e também tem uma natureza resistente. No Reino Unido, um suculto ganhou o prêmio de planta do ano 4 da Royal Horticultural Society greenbets login 2024 enquanto as plantas tornaram-se muito popular na Ásia países levando a Um boom 4 maciço no demanda

No entanto, as plantas tolerantes à seca são muitas vezes provenientes da natureza. A África do Sul é 4 o lar de um terço das espécies suculentaes mundiais e há uma grande quantidade delas na Califórnia onde alguns tipos 4 raros crescem; por exemplo: ilegal tomar cacto no México ou greenbets login outros países para evitar que os animais sejam levados 4 a cabo com sucesso pelo governo mexicano?

A prática tornou-se cada vez mais divisiva no mundo suculento, mas muitos a consideram 4 como norma.

Gregory Bulmer, presidente da British Cactus and Succulent Society (BCSS) desde 2024 disse que não pode mais permanecer no 4 cargo por causa de sucultuentes desenterrados dos seus habitats nativos.

Bulmer tinha introduzido uma nova política exigindo que as plantas "removidas 4 do habitat" - a maneira padrão de se referir às vegetais tiradas da natureza- não fossem exibidas ou dadas prêmios 4 nas exposições.

Em um e-mail para os membros, ele disse: "Devemos estar pensando greenbets login frente ao considerar a reputação de longo 4 prazo da sociedade. Mas a política 4 levou à tal consternação que Bulmer disse não ter escolha senão desistir.

Bulmer explicou: "Como órgão governante, os curadores devem ter 4 a capacidade de definir políticas que eles consideram ser do melhor interesse da caridade. Apesar dos votos feitos por administradores 4 no final deste ano para banir essas plantas das mostras BCSS tornou-se evidente uma oposição sustentada e forte contra 4 implementar essa proibição daqueles greenbets login vários níveis ao longo desta sociedade tornaria isso indeliverable."

"Eu não sinto mais que tenho o 4 apoio de quem preciso para entregar mudanças significativas à caridade e decidi deixar a presidência do BCSS com efeito imediato."

Pat 4 Collins, um especialista greenbets login suculentas costumava ser membro do BCSS mas também desistiu devido à falta de aplicação da 4 lei sobre a remoção das plantas na natureza.

Ele disse: "Sempre houve alguma tensão entre o aspecto da jardinagem e do 4 aspeto de conservação na sociedade. Ainda há muitos membros seniores que compraram plantas arrancadas dos habitats nos anos 60 ou 4 70, mas não vêem problema greenbets login continuar."

Collins acrescentou que uma série de membros seniores da sociedade também havia desistido sobre 4 a prevalência do caça furtiva.

No entanto, alguns membros da sociedade acham que a proibição seria inexequível. Escrevendo greenbets login um fórum 4 apenas para os associados visto pelo Guardian Um entusiasta escreveu: "Muitas das plantas agora podem ser consideradas como sendo 4 coletadas por uma juíza de show pode não existir realmente - Não parece haver nenhuma maneira infalível De provar se 4 há ex-habitat ou simplesmente planta antiga cultivada com sementes e estacas especialmente caso tenha sido cultivado duros até mesmo na 4 coleção?"

Cientistas do Kew Gardens, principal centro de pesquisa vegetal 4 no Reino Unido tem apoiado Bulmer greenbets login greenbets login posição.
